Northwest Area Learning Community Mission Statement

In collaboration with family and community partners, the Northwest Area School District provides a continuum of services that support ALL students to realize their fullest potential through academically rigorous and relevant programs of study.

Core Beliefs

We believe that student success is achieved by:

- Encouraging life-long learning
- Promoting effective communication
- Cultivating professional development opportunities
- Stimulating critical thinking skills
- Fostering character development
- Setting challenging academic expectations
- Providing a healthy social and emotional environment

Credited Courses

Northwest Area Senior High and Middle School provides a range of courses that enable students to attain academic standards. Credited courses consist of at least the following elements:

1. An alignment with post secondary goals to be completed by all students prior to graduation
2. Content, including materials and activities, and estimated instructional time to be devoted to achieving the academic standards
3. A relationship between the credits, instructional unit or interdisciplinary studies and academic standards specified under *Section 4.12* (relating to academic standards) and to those determined in the school district's (including charter schools) or AVTS's strategic plan under *Section 4.13* (relating to strategic plans).

School Profile

The Northwest Area School District is a small, rural district located in Shickshinny, Luzerne County approximately 16 miles southwest of Wilkes-Barre, PA. The district has been in existence since 1955 when several smaller schools combined to form Northwest Area. Northwest Area Senior High and Middle School is a comprehensive high school consisting of grades 7-12 with 430 students. There is a Primary School with 245 students in grades PreK-2 and an Intermediate School with 300 students in grades 3-6. Northwest Area High School has 45 certified staff members.

Academic Program

Students are required to complete appropriate credits for graduation. In addition, all students are required to maintain a career-based portfolio to collect artifacts from career activities throughout all grade levels. Select juniors and seniors are permitted to enroll in a local college while still attending Northwest Area High School. They are permitted to take a maximum of 2 college courses per semester and must attend college both semesters. These courses are listed on their high school transcript and noted as "Col" following the name of the course (Eng. Comp. Col). The colleges have provided conversion tables for their grading systems. Credit is given toward graduation requirements for these elective courses.

Grading System

Numerical grading based on 100% with 70% as a passing grade.

A = 100 to 93 **B** = 92 to 85 **C** = 84 to 76 **D** = 75 to 70 **F** = 69 to 0

Grade Point Average

Grade point average, based on a 100 point grading scale, is calculated quarterly by including all courses taken as well as the college courses noted above. Due to the additional time requirements for certain courses, they are listed as 1.5 or 2.0 credits. GPA is reported on the transcript as both current (this year) and cumulative (9-12).

Rank in Class

Class rank is calculated annually for all students. All courses are included in the calculation. Rank is reported on the transcript as current (this year) and cumulative (9-12).

Online Learning

Students will have the option of taking classes through online options from a variety of vendors. The only time students can enroll in electives is during course selection. If students change their mind after selecting an online course they and/or their parents will be assessed the cost of the class. All online grades are part of the grade point average and class rank. If the students fail to complete the class they will receive zeros for all incomplete assignments.

Weighted Grades

AP Course grades will be weighted with a multiplier of 1.05, and not rounded, as a way to encourage students to challenge themselves with courses that provide a higher level of rigor. Any average that is calculated based on a weighted multiplier will not be rounded any further.

NCAA Eligibility

For a student interested in continuing their athletic career on the Division I or II collegiate level, the following courses have been approved by NCAA for purposes of eligibility. These courses are considered to be college prep level courses providing a rigorous academic environment which will be accepted by the NCAA. Please see pages 6 and 7 (worksheets) to track eligibility.

Course Selection Information

1. Students should discuss their proposed course selection with their parents or guardian and be prepared to meet with a counselor. Students should be certain they have the necessary prerequisites before selecting a course.
2. A counselor will prepare a course selection form for students who do not submit a completed and properly signed form by the prescribed date.
3. Students should select their electives with care. A student expecting to further his/her education should plan his/her courses so that he/she has the necessary subjects for admission.
4. College entrance requirements for specific college majors vary greatly from one institution to another. Students and parents are reminded that most college entrance requirements are based on all four grades of high school. Credits outlined by the college catalogues are the minimum requirements for entrance. Students should pursue a well-rounded college preparatory curriculum, which will prepare them to complete college level work successfully.
5. Suggested grade levels are marked with each course to help students in selecting their programs.
6. Once a student begins a course that he/she scheduled, district practice is that the student remains in that course for the entire school year, regardless of the student's performance.
No schedule changes will be made after the 10th day of school.
7. Course selection is one of the most important tasks that a student and his/her counselor accomplish together. Consider with care the many courses listed in this guide. Counselors will do everything possible to help students select the most appropriate program of studies for the next academic year. This guide has been designed to meet the needs of all students. Students should read it carefully as they select courses for next year. If students or parents have any questions about selections, please see a guidance counselor.

Northwest Area High School Graduation Requirements:

- All students must pass at least 24.5 credits including the minimum course sequence in all areas:

Requirement

Language Arts	4.0
Mathematics	4.0
Science & Technology	4.0
Social Studies	4.0
Family/Consumer Sci.	0.5
Wellness	2.0
Arts/Humanities	1.0
Computer Tech Ed.	1.0
Electives	4.0

Total	24.5
-------	------

Note:

- College bound students are recommended, not required to schedule and pass two years of a foreign language.
- Sequences of courses play an important role in the scheduling process.
- There is an emphasis on student reading, writing, speaking and listening skills at all grade levels and content areas.
- Graduation requirements for transfer students are subject to revision and review by the principal's office to determine eligibility for graduation.

Act 158 Pathways to Meeting Graduation Requirements

Act 158 of 2018 provides alternatives to Pennsylvania's statewide requirement of attaining proficiency on the three end-of-course Keystone Exams (Algebra I, Literature, and Biology) in order for a student to achieve statewide graduation requirements. This toolkit is designed to provide guidance as a result of the enactments of Act 158 and Act 6 of 2017 (Act 6), which established alternative pathways to meeting statewide graduation requirements for students who are Career and Technical Education (CTE) concentrators.

Effective with the graduating class of 2023, students have the option to demonstrate postsecondary preparedness through one of four additional pathways that more fully illustrate college, career, and community readiness. Keystone Exams will continue as the statewide assessment Pennsylvania uses to comply with accountability requirements set forth in the federal Every Student Succeeds Act (ESSA). Although students will no longer be required to achieve proficiency on the Keystone Exams in order to meet statewide graduation requirements, students must take the Keystone Exams for purposes of federal accountability. Failure to do so will affect a Local Education Agency (LEA) and school's participation rate.

Pathways

For students graduating in 2023 and beyond, five pathways exist for meeting state high school graduation requirements:

- Keystone Proficiency
- Keystone Composite

- Career and Technical Education (CTE) Concentrator
- Alternative Assessment
- Evidence-Based

Students with Disabilities

Any student with a disability who satisfactorily completes a special education program developed by an individualized education program team under the Individuals with Disabilities Education Act and 22 Pa. Code Ch. 14 (relating to special education services and programs) that does not otherwise meet the requirements of Act 158 or Act 6 shall be granted and issued a regular high school diploma by the student's LEA. Note: Students who graduate in this manner are not considered to have been granted waivers under Act 158.

For further information on the criteria for the individual pathways, please follow this link:
<https://www.pdesas.org/Page/Viewer/ViewPage/56/>

Northwest Area School District Annual Notice of Gifted Support Services

The Northwest Area School District is committed to providing Gifted Support services to those students who are eligible and in need of these services.

The Northwest Area School District provides programming for students who are identified as Mentally Gifted. This term includes a person who has an IQ of 130 or higher or when multiple criteria as set forth in Chapter 16 regulations and in Department Guidelines indicate gifted ability. Determination of gifted ability will not be based on IQ score alone. Deficits in memory or processing speed, as indicated by testing, cannot be the sole basis upon which a student is determined to be ineligible for gifted special education. A person with an IQ score lower than 130 may be admitted to gifted programs when other educational criteria in the profile of the person strongly indicate gifted ability. Determination of mentally gifted must include an assessment by a certified school psychologist.

Identification (Child Find) Activities:

Building level teams meet regularly at the elementary, intermediate, middle school, and high school levels to monitor student progress, to develop intervention strategies, and to identify students who may need gifted services. The teams consider a variety of academic, behavioral, speech/language, and motor development information. Guidance counselors, working in collaboration with their district colleagues at all levels, are also important front line personnel in child find procedures.

The analysis of assessment results is an important child find strategy, and students may be referred to the school guidance counselor and/or school psychologist for additional assessment.

Initiating an Evaluation:

Parents who have questions about their child's academic or developmental growth and believe that their child may be Mentally Gifted should contact the appropriate building principal, school guidance counselor, or the Gifted Coordinator to request screening and/or evaluation. A parental request for a gifted evaluation should be made in writing.

Language Arts Required Courses

English 9 Essential English 562

Grade Level: 9 1 Credit

Prerequisite: Students must have successfully completed 8th grade English.

The ninth grade Essential English course, based on a broad variety of literary genres builds on the learning and skill levels developed in the eighth grade. The focus of Essential English is the effective use of language for communication. The curriculum, which includes the study of specific novels, short stories, poetry, grammar, and vocabulary, concentrates on attaining these skills. Learners will cultivate active reading strategies that will enable them to not only understand and analyze fictional and non-fictional texts, but also to critically write about literature. Independent reading is required of all students and will be assessed during the school year.

English 9 509

Grade Level: 9 1 Credit

Prerequisites:

1. Passing grade in current English class
2. Recommendation to take academic level from 8th grade English and Reading Teacher

English 9 focuses on multiple experiences in a variety of literary genres. Classes will focus on thematic and literal meanings of readings as well as the literary devices related to various genres. This course emphasizes instruction and practice in oral and written composition and also improvement of language skills. Students are challenged to demonstrate skills in a variety of written responses to informational, persuasive and creative assignments. Basic grammar skills taught in eighth grade are the expected knowledge base. Additional skills will be taught and reinforced. Students are responsible for retaining skills, completing assignments and participating in class. Independent reading is required of all students and will be assessed throughout the school year. Students will be required to read novels/plays in addition to poetry, short stories and independent reading assignments.

Intensive English 9 0583

Grade Level: 9 1 Credit

Prerequisites: Student must fulfill the following requirements in order to take Intensive English 9:

1. An "A" average in eighth grade English.
2. Recommendation to take intensive from current English teacher.

Intensive English 9 is a reading, writing, and grammar intensive course designed for the motivated freshman. This course provides students with an intensive thematic examination of American and world authors and a variety of literary genres. Areas of study include extensive investigation of literary devices as well as author motivation and historical context. Students are expected to research, to analyze and to interpret each piece of literature and to participate in classroom discussions. Writing expository/informational and persuasive essays is the main focus; students are expected to include literary and researched proof in their essays and to have a firm working knowledge of the grammar skills taught in 8th grade. Grammar skills will be reinforced and taught. Independent reading will be required of all students and will be assessed during the school year. Students will read numerous novels/plays in addition to poetry, short stories, and independent reading assignments.

English 10 Essential English 563

Grade Level: 10 1 Credit

Prerequisite: A passing grade in 9th grade English

The tenth grade English course that is based on *World Literature* builds on the learning and skill levels cultivated in the ninth grade. In the study of various forms of literature, students experience the people, the places, the ideas, philosophies, culture and the language of both western and eastern civilizations alike, practice grammatical concepts, vocabulary and writing skills. Sophomores will be expected to respond to the literature examined in numerous ways which include, but are not limited to: class discussion, informal and formal written products, informal and formal presentations, projects and summative assessments. In Essential English 10, learners will cultivate active reading strategies that will enable them to not only understand and analyze fictional and non-fictional texts, but also critically write about literature.

English 10 511

Grade Placement: 10 1 Credit

Prerequisites: Students must fulfill the following requirements in order to take the academic level in tenth grade:

1. Passing grade in current English class.
2. Recommendation to take the academic level from current English teacher.

The sophomore year focuses on the development of World Literature by engaging in an examination and survey of the literary contributions of multicultural authors whose literary contributions represent a broad spectrum of genres and cultures. In *World Literature*, sophomores are afforded with an opportunity to critically examine the prose, poetry and drama of multicultural writers whose works serve as an artifact of cultures out of which they evolved. World Literature examines multicultural works from antiquity to modern times, offering students an opportunity to study major literary works in the context of cultural values, historical periods and philosophical frameworks. Students are presented with the basic terminology and devices for interpreting and analyzing literature that represents a variety of genres. In doing so, students cultivate a strong foundation in critical reading strategies and literary criticism. Throughout the year, students will be assessed on a variety of expository essays, vocabulary, summative assessments focusing upon the literature, the historical/philosophical context of the literature and the biographical information on the authors.

Intensive English 10 584

Grade Placement: 10 1 Credit

Prerequisite: Students must fulfill the following requirements in order to enroll in 10th Intensive English:

1. Final grade of "A" in English 9.
2. Final grade of "B" or higher in ninth grade Intensive English.
3. Recommendation of 9th grade English teacher.

Intensive English 10 is a reading and writing intensive course for the highly motivated sophomore willing to assume a rigorous and challenging study of *World Literature*. Independent thinking, reading and creative expression is greatly encouraged. The "intensive" student is expected to possess a strong foundational knowledge of grammar, mechanics and writing conventions. Based on the class discussion format, students will be given an opportunity to explore new ideas and incubate ambitious and thought-provoking arguments. Students will examine a variety of multicultural works from antiquity to modern day which reflect a variety of cultural and philosophical frameworks, and be asked to synthesize new learning, reading and written products in order to cultivate critical connections. Honors English 10 affords learners with an exploration of the great works of world literature in their historical and philosophical contexts so that students may discover the variety and development of human thought and feeling in various cultures. Works of the Classical, Medieval and Renaissance periods in Europe as well as Asian and Middle-Eastern works that have influenced the West, in the forms of poetry, drama and fiction are examined. Evaluations are based on lecture, small and large group activities and presentations, individual assignments, readings, quizzes, essays and tests. Independent reading is required and will be essential during the school year.

English 11 Essential English 564

Grade Placement: 11 1 Credit

Type of Course: Fulfills an English requirement for graduation.

Prerequisite: A passing grade in 10th grade English

The eleventh grade Essential English course, based on American Literature, builds on the learning and skill levels developed in the tenth grade. In the study of various forms of literature, students experience the people, the places, the ideas and the language of America, and practice grammatical concepts, vocabulary and writing skills. In Essential English 11, learners will cultivate active reading strategies that will enable them to not only understand and analyze fictional and non-fictional texts, but also critically write about literature.

English 11 514

Grade Placement: 11 1 Credit

Length of Course: One Year Type of Course: Fulfills an English requirement for graduation.

Prerequisites: Students must fulfill the following requirements in order to take the academic level in tenth grade:

1. Passing grade in current English class.
2. Recommendation to take the academic level from current English teacher.

The sophomore year focuses on the development of American literature by tracing themes that recur at various periods in the nation's history. An extensive review and study of formal grammar and vocabulary will be completed. The students learn to use APA style documentation. Frequent writing by the students is of a critical nature and is directly related to the developmental and thematic focus of American literature. Engaging in such an examination, students are afforded with an opportunity to: (1.) acquire an understanding of the ideas, literary genres, literary devices and language employed by American authors; (2.) cultivate an awareness of the inextricable relationship between literature and cultural practice; (3.) develop the communication skills necessary to collaborate in an interdependent society; (4.) explore career options and their implications; and (5.) cultivate the requisite skills necessary to effectively construct a collegiate-level research paper. Lastly, students will read numerous novels/plays in addition to poetry, short stories and independent reading assignments.

Intensive English 11 585

Grade Placement: 11 1 Credit

Prerequisites: Students must fulfill the following requirements in order to enroll in Intensive English 11:

1. Final grade of "A" in English 10.
2. Final grade of "B" or higher in Intensive English 10.
3. Recommendation of 10th grade English teacher.

Intensive English 11 is a reading and writing intensive course for the highly motivated 11th grader willing to assume a rigorous and challenging study of American Literature and culture. Independent thinking, reading and creative expression is greatly encouraged. A solid background in grammar is expected. The literature is arranged and explored in order of historical events. This course will examine the historical and cultural impact on the literature of the United States. Engaging in such an examination, students are afforded with an opportunity to: (1.) acquire an understanding of the ideas, literary genres, literary devices and language employed by American authors; (2.) cultivate an awareness of the inextricable relationship between literature and cultural practice; (3.) develop the communication skills necessary to collaborate in an interdependent society; (4.) explore career options and their implications; and (5.) cultivate the requisite skills necessary to effectively construct a collegiate-level research paper. Evaluations are based on lecture, small and large group activities and presentations, individual assignments, readings, quizzes, essays and tests. Students will read numerous novels/plays in addition to poetry, short stories and independent reading. Independent reading is required and will be essential during the school year.

English 12 Essential English 565

Grade Placement: 12 1 Credit

Prerequisite: A passing grade in 11th grade English

The twelfth grade English course, which is based on British Literature, builds on the learning and skill levels cultivated in the eleventh grade. In the study of various forms of literature, students experience the people, the places, the ideas, and the language of the British Isles, and practice grammatical concepts, vocabulary and writing skills. In Essential English 12, learners will cultivate active reading strategies that will enable them to not only understand and analyze fictional and non-fictional texts, but also critically write about literature. Independent reading is required of all students and will be assessed during the school year.

English 12 512

Grade Placement: 12 1 Credit

Prerequisites: Students must fulfill the following requirements in order to take the academic level in twelfth grade:

1. Passing grade in current English class.
2. Recommendation to take the academic level from current English teacher

The senior year focuses on the development of British Literature by engaging in a chronological examination and survey of the literary contributions of British authors that span from the Anglo-Saxon Period to the Twentieth Century. In British Literature seniors will be afforded with an opportunity to critically examine the classic, prose, poetry and drama of English writers whose works serve as an artifact of bygone British culture. Throughout the year, students will be assessed on a variety of expository essays, vocabulary, summative and authentic assessments focusing upon the literature, the historical context of the literature and the biographical information on the authors.

AP English 588

Grade Placement: 12 1 Credit

Prerequisite: Final grade of A in Intensive English 11 and teacher recommendation.

This Advanced Placement English Literature and Composition course is a college level course, which encourages the development of skills in critical reading of imaginative and discursive literature and in writing about literature and related ideas. It follows the curricular requirement described in the AP English Course Description and is for students who are capable of doing college level work in English, while they are still in secondary school. It is designed for those who are willing to devote the energy necessary to complete a course more rigorous and demanding than other high school English courses designed for the college bound student.

The short term goal of this course is to enable students to demonstrate their achievement by taking the Advanced Placement English Examination in Literature and Composition in May. The long term goals of the course are to enable students to learn at a rate commensurate with their ability, to deal with material that intellectually mature students find engaging, to refine reading and writing skills important for success—not only for college but also in the business and professional world—and to cultivate habits of reading, writing and thinking that characterize lifelong learning and enjoyment.

This course will be weighted by 1.05.

Language Arts Electives

Creative Writing 577

Grade Placement: 10-12 1 Credit

Prerequisite: 85% or better in Current English Class

This course provides students with exposure to a variety of writing strategies and modes to express themselves while cultivating their writing style and skills. In Creative Writing, students will be encouraged to identify their strengths and interests as a writer while developing their own resources of observation, style and voice. Creative Writing affords students with an opportunity to write in a wide range of genres which include but are not limited to: exposition, fiction, poetry, biography, playwriting and journalism. The emphasis of this student-centered course is the discovery of the student's individual direction and style through analysis of literature, experimentation, practice and constructive feedback.

Mass Communications and Graphic Design 578

Grade Placement: 10-12 1 Credit

This course will investigate various forms of news media as a theory and application. Students will have the opportunity to study many forms of media in print, radio, television, and many modern forms of mass communications. Building a foundation and the application to create will be a key component for this course. Students will use hands-on computer applications to create newspapers, blogs, podcasts, videos, and much more. This course will alternate every other year with Great Books and Effective Speech.

Mathematics Progression

	7	8	9	10	11	12
Designed for students who want the most rigorous coursework offered or for students who plan to pursue a math or science related college major.	Introduction to High School Mathematics	Algebra I	Algebra II & Geometry	Trigonometry	Calculus or Pre-Calculus	AP Calculus or Calculus
Designed for students who plan to attend a 4 year college, most 2 year colleges or technical schools.	Introduction to High School Mathematics	Pre-Algebra	Algebra I	Geometry & Algebra II	Trigonometry	Pre-Calculus or Calculus
Designed for students who plan to pursue a certificate or diploma program or enter the workforce directly from high school.	Introduction to High School Mathematics	Introduction to High School Mathematics II	Algebra IA	Algebra IB	Essentials of Geometry and Trigonometry	Intermediate Algebra II ↓ Topics in Algebra and Trigonometry

Students are responsible to work with their math teachers and their guidance counselors to determine their sequence through the math progression. At any point in which a student deviates from one of the natural sequences listed above, the team of guidance, former math teachers and the principal will work with the student for appropriate course placement. The principal will have the final say concerning course placement.

Mathematics Math Sequence

Algebra 1A 222

Grade Placement: 9 1 Credit

Prerequisites: Introduction to High School Mathematics II or Pre-Algebra

This course is designed to teach the student how to solve and graph the solution sets of equations and inequalities in one variable; to solve absolute value equations and inequalities; to evaluate polynomial expressions containing exponents; to factor polynomial expressions; to solve word problems; and to solve basic probability problems.

Algebra 1B 223

Grade Placement: 10 1 Credit

Prerequisite: Algebra 1A

This course is designed to teach the student how to evaluate rational expressions; to solve and graph the solution sets of linear equations and inequalities; to recognize functions and identify the domain and range of a function; to write and evaluate composite functions; to solve word problems algebraically; and to solve basic probability problems.

Algebra I 203

Grade Placement: 9 1 Credit

Prerequisites: Recommendation of teacher and/or satisfactory completion of Pre-Algebra

Algebra I is designed to teach the students to solve, analyze and graph linear functions, inequalities, and systems within the real number system, as well as operations with polynomials and factoring.

Essentials of Geometry and Trigonometry 225

Grade Placement: 11-12 1 Credit

Prerequisite: Algebra 1B or Algebra I

This course covers the fundamental concepts of Euclidean geometry without emphasizing theory and proof. Geometry topics include congruent and similar figures, parallel lines, polygons, and circles. Trigonometry topics include right triangle ratios, special right triangles, and trigonometric functions.

Geometry 212

Grade Placement: 9-11 1 Credit

Prerequisites: Algebra I

This course presents the fundamental Euclidean geometric postulates and theorems concerning points, lines, planes, angles, polygons, and circles. In addition, basic topics from analytic geometry and trigonometry are included. Students are expected to understand and to apply the properties of geometric figures to solve problems and to develop logical proofs of basic geometric concepts.

Intermediate Algebra II 224

Grade Placement: 11-12 1 Credit

Prerequisite: Algebra 1B or Algebra I

This course is designed to teach the student how to solve and graph systems of linear equations and inequalities; to evaluate complex rational expressions; to solve equations containing radicals, irrational numbers, and complex numbers; to solve and graph quadratic functions; and to find terms of a sequence or series.

Topics in Algebra and Trigonometry 215

Grade Placement: 12 1 Credit

Prerequisites: Algebra I, Essentials of Geometry, Intermediate Algebra II
(By recommendation of Mathematics Department ONLY)

This course is designed to reinforce algebraic concepts and present basic trigonometry concepts, identities and their applications.

Algebra II 204

Grade Placement: 9-10 1 Credit

Prerequisites: Algebra I

Algebra II is designed to reinforce and extend the topics of Algebra I. Additional topics are simplifying radicals, working with rational expressions, writing and graphing quadratic equations, and solving systems of two or more equations in two or more variables.

Trigonometry 214

Grade Placement: 10-12 1 Credit

Prerequisites: Cumulative Average of 82 or higher in Algebra I, Geometry and Algebra II

This course presents the basic trigonometry concepts, identities and their applications. The course content includes definitions of the trigonometric functions, solving right triangles, radian measure, linear and angular velocity, graphing the six trigonometric functions, trigonometric identities, inverse trigonometric functions and the laws of sines and cosines applied to oblique triangles.

Statistics 275

Grade Placement: 11-12 1 Credit

Prerequisites: Algebra II, Geometry or currently taking Geometry

Statistics is the science of collecting, organizing, analyzing and interpreting data in order to make decisions.

Individual and group projects based on real life statistical situations as well as traditional tests and quizzes will be used to evaluate student performance.

Calculus 206

Grade Placement: 11-12 1 Credit

Prerequisites: Cumulative average of 82 or higher in Algebra II, Geometry, Trigonometry

This course will begin with a brief review of Algebra and Trigonometry concepts. The main body of the course will be derivatives as well as the rules and applications of differentiation. The course will conclude with integrals along with some of the rules and applications of integration. This course is an introduction to basic Calculus.

AP Calculus and Lab 202

Grade Placement: 12 2 Credits

Prerequisite: 90 in Calculus with Teacher Recommendation

Advanced Placement (AP) Calculus is a college-level calculus course that is intended to prepare students for college calculus. In addition, students who pass the Advanced Placement Calculus Exam may be exempt from college calculus if the college or university permits such exemption. Topics discussed in AP Calculus include functions, limits and continuity, derivatives and their applications, indefinite and definite integrals and their applications and techniques of integration. Due to the demanding nature of the course, students are expected to be familiar with some of the topics as a result of having taken Calculus. In addition, a strong foundation in algebra is extremely valuable. A graphing calculator is required, but will be provided for the duration of the course. Any student who chooses to purchase their own calculator should consider contacting the college they plan to attend for information on acceptable calculators before making a purchase.

AP credit will be given to students who take the appropriate AP test and score 3 or better.

This course will be weighted by 1.05.

Mathematics Electives

AP Computer Science A (JAVA) 200

Grade Placement: 11-12 1 Credit

Prerequisites: Algebra II and Geometry

AP Computer Science A is an introductory college-level computer science course. Students cultivate their understanding of coding through analyzing, writing, and testing code as they explore concepts like modularity, variables, and control structures. This course will provide a structured hands-on programming course using the language JAVA. The student must be able to log-on, use the keyboard, save and print to the network. A background in Algebra and Geometry will aid in the writing of programs. Topics covered in the programming class include variables, loops, methods, classes and graphics. The student will be assessed by writing programs and taking tests.

Principles of Engineering 273

Grade Placement: 11-12 1 Credit

Prerequisite: Calculus or currently taking Calculus

This course can also be taken as a 3-credit Dual Enrollment through Penn State with an additional cost to the student.

Principles of Engineering will introduce students to design processes leading to implementation through group collaboration. Math and decision-making skills combined with communication will be the pillars of this course.

AP Computer Science Principles 209

Grade Placement: 9-12 1 Credit

Prerequisites: 80% or higher in Algebra 1 or Algebra 2

AP Computer Science Principles will introduce students to the creative aspects of programming, abstractions, algorithms, large data sets, the Internet, cybersecurity concerns, and computing impacts. AP Computer Science Principles also gives students the opportunity to use current technologies to create computational artifacts for both self-expression and problem solving. Together, these aspects of the course make up a rigorous and rich curriculum that aims to broaden participation in computer science.

AP credit will be given to students who take the appropriate AP test and score 3 or better.

This course will be weighted by 1.05.

Science and Technology Required Courses

Environmental Science 316

Grade Placement: 9 1 Credit

This course is designed to familiarize students with watersheds' renewable and non-renewable resources; environmental health; agriculture and society; integrated pest management; ecosystems and their interactions; threatened, endangered, and extinct species; and humans and the environment. Students will be habituated with problems concerning air, water, sound and soil pollution. The student will synthesize, analyze and collect data from the environment. Chapter 4 requirements for Environment and Ecology are integrated into this course.

Biology I and Lab 301

Grade Placement: 9-10 1 Credit

Biology I describes in detail a historical perspective of biology, biochemistry, cells, movement into and out of cells, DNA and protein synthesis, biotechnology, cellular energy, genetics and heredity, evolution of organisms, classification of organisms and the diversity of life and ecology. This is a required course for all tenth-grade students. Ninth grade students who wish to take this course in addition to Environmental Science need a 93 or better in 8th grade Science.

Honors Biology 303

Grade Placement: 9-10 1 Credit

Prerequisites: 95 or better in the previous science course

Students in Honors Biology may take Comparative Anatomy concurrently with teacher recommendation.

Students will investigate the science of biology through rigorous and accelerated course work in the following content areas: biochemistry, cells, cellular energy, nucleic acids and protein synthesis, cellular growth and division, genetics and heredity, biotechnology, evolution and the origins of life, the diversity of life, the environment and ecology. Students will be expected to complete laboratory work and written reports as well, and oral presentations of their original lab work in all of the areas listed. This course may require experimentation on living organisms (bacteria, pill bugs, etc.). Students will also be expected to explore biology by completing reading and writing assignments outside of class.

Either Chemistry for the Community or Chemistry I is required by the end of the 11th grade year.

Chemistry for the Community 314

Grade Placement: 11 1 Credit

This is a student-centered, activity-based, issues-oriented chemistry course that encourages small-group learning. It includes many traditional chemical concepts and laboratory skills, as well as more biochemistry, industrial, organic and nuclear chemistry than is normally encountered in a standard high school chemistry text.

Chemistry I and Lab 304

Grade Placement: 11 1 Credit

Prerequisites: Algebra II

Chemistry is the science of matter and its changes the effort to understand the laws governing the behavior of atoms and molecules. General chemistry introduces the student to the basic principles of chemistry and emphasizes both the qualitative and quantitative aspects. Topics studied include the metric system, significant digits and scientific notation; properties of elements, compounds, mixtures; formula writing; balancing equations and predicting products in a chemical reaction; mole concepts; atomic theory and the periodic table; chemical bonding; stoichiometry; and gas laws, aqueous solutions and descriptive chemistry of selected elements and compounds. Chemists study abstract theories in an effort to understand fundamental laws. They can then apply them in making new materials, eliminating pollution, fighting diseases and detecting crime, for example. This course is highly recommended for all college bound students and should be considered mandatory for science-oriented students.

Chemistry II and Lab 305

Grade Placement: 11-12 1.5 Credit

Prerequisites: Algebra II and Chemistry I

This course covers all topics discussed in Chemistry I in greater detail and also includes the study of molecular geometry and bonding theories, intermolecular forces, chemical equilibrium, acid-base equilibrium, thermochemistry and kinetics. Labs will stress the quantitative aspects of analysis. This course is recommended for all college bound science majors. This course will be scheduled for a double period every other day. Please plan accordingly.

Physics I and Lab 309

Grade Placement: 11-12 1 Credit

Prerequisites: Trigonometry OR recommended by your math and science teachers for Trigonometry concurrently with Physics. Against Teacher Recommendation is not an option.

This course is an advanced alternative to Advanced Physical Science. It is a general first year Newtonian physics course, which presents in detail the basic laws that govern the nature of matter and energy. It covers in-depth concepts of forces and motion, conversions of energy, behaviors of light and sound waves, and electricity. Each of these topics also includes calculating values based on given real-world situations. Lab activities include both demonstrations of concepts and quantitative calculations. This course places light emphasis on some modern physics topics such as black holes, particle physics and special relativity. This course is recommended for college-bound science or pre-med/physician's assistant majors.

Advanced General Science 312

Grade Placement: 12 1 Credit

The Science Topics course is designed to be an alternative to Physics for non-science majors or non-college bound students. This course is a laboratory-based, hands-on science class in which students will study but not be limited to the following topics: principles of science, matter and energy, structure of atoms, forces, motion, magnetism and electricity.

Science and Technology Electives

AP Biology and Lab 313

Grade Placement: 11-12 2 Credits

Prerequisites: 93% or better in Chemistry I and Biology I or Honors Biology

Students will study the following content areas as defined by The College Board: Molecules and Cells 25%, Heredity and Evolution 25% and Organisms and Populations 50%. In order to explore the areas listed above, students will be involved in twelve required labs which involve experimenting on living organisms (fruit flies and pill bugs). The course is taught as a freshman, biology major, and college level course. Some of the things the students will be asked to complete are the following: required readings and writings outside of class, laboratory reports, essay exams, objective exams and hands-on laboratory manipulations. This course will be scheduled for a double period every day. Please plan accordingly.

This course will be weighted by 1.05.

Biotechnology and Medical Technology 320

Grade Placement: 11-12 1 Credit

Prerequisites: Biology I and Chemistry I with a minimum of 85% in each course

This course is a laboratory-based science class in which students will explore the applications of the field of biotechnology and how it applies to modern medical technology. Students will learn how to isolate DNA, perform gel electrophoresis, PCR and analyze DNA fingerprints. Biotechnology provides us with useful research tools. Technology touches us by producing new pharmaceuticals, food, textiles, chemicals, paper and degrading environmental pollutants. This course is designed to explore biotechnology's influence on life from cellular and molecular biology to ecology and evolution. The main focus of the course will be to familiarize students with laboratory procedures and techniques with an emphasis on their application in the medical field. Students considering a career in the medical field such as nursing, medical technology or veterinary technician would benefit from this course.

Human Anatomy and Physiology 0326

Grade Placement: 10-12 1 Credit

Prerequisites: Biology 1 with an average of 90% or better

Students will explore the structure and function of the human body. The course's scope includes the muscular, skeletal, cardiovascular, integumentary, nervous, respiratory, and reproductive systems. The course culminates in a mandatory mammal dissection.

Students in Honors Biology may take Human Anatomy and Physiology concurrently with teacher recommendation.

Social Studies Required Courses

American History II 704

Grade Placement: 9 1 Credit

In this course, students will examine how the United States developed post Reconstruction into an industrialized nation and super power on the world stage. By analyzing primary and secondary sources, students will examine the political, cultural, social, economic, and historical significance of events from approximately 1865-1945. Topics include the Industrial Revolution, the Gilded Age, Progressive Era, World War I, Prohibition, the Roaring Twenties, the Great Depression, Dust Bowl, New Deal, and World War II.

American History III 707

Grade Placement: 10 1 Credit

Suggested Prerequisites: American History II

American Cultures III will provide a survey of American history since the end of World War II.

The survey will include the closing events of World War II, America's role as a world superpower, social unrest and reforms, the Cold War Era, economic issues, conservative vs. liberal politics and the ongoing War on Terror.

Students will be expected to have an understanding of important social, political and economic events, the zeitgeist changes, and the women and men that were involved with them.

Students will be able to understand, explain and relate the significance of these historical events and people through written essays, various test formats, oral reports, research papers and classroom discussions.

Modern World History 712

Grade Placement: 11 1 Credit

Modern World History will focus on the era beginning with the Period of Industrialization and continuing through events in the Twentieth Century (approximately 1750-present). Each student will become familiar with events of global importance that helped to shape the world in which we live today. The course will follow a chronological order of historical events relevant to the world perspective. Students will be required to conduct research and compose a scholarly paper on a chosen topic along with completing several supplemental reading assignments.

Government and Current Events 713

Grade Placement: 12 1 Credit

This course is designed to give students a basic understanding of the American system of government. Students will study principles and documents of government; how government works; relationships among federal, state, and local governments, and how international relationships function. Students will also explore and investigate the legal system, court cases, constitutional issues, the influence of government in daily life, and the rights and responsibilities of American citizenship. Current political/social events and issues will also be discussed. Chapter 4 requirements for Civics and Family and Consumer Sciences are integrated in this course.

AP Government 711

Grade Placement: 12 1 Credit

Prerequisite: 93 or higher in grade 11 history course + recommendation from 11th grade history teacher

This AP course will give students an analytical perspective on United States Government and Politics. This course includes both the study of general concepts used to interpret US government and politics and the analysis of specific examples. It also requires familiarity with the various institutions, groups, beliefs, and ideas that constitute US government and politics. Through this course, students will become acquainted with the variety of theoretical perspectives and explanations for various behaviors and outcomes.

Family and Consumer Science 674

Grade Placement: 9 .5 Credit

This course will address the skills and knowledge needed to help students prepare for life on their own. There will be an emphasis on building an understanding of everyday living. There will be a focus on building and maintaining positive relationships through proper communication techniques and balancing family, work and community responsibility. Also included is the importance of healthy living such as proper nutrition, meal management and kitchen safety/sanitation.

Social Studies Electives

The American Presidency 718

Grade Placement: 10-11 1 Credit

Recommended Prerequisite: 85 or higher average in previous year's history class

This course will examine the creation, function, and evolution of the role of the executive branch of the United States government from George Washington to the current administration. The specific focus is the power of the president and their interaction with the federal government.

Sociology 715

Grade Placement: 11-12 1 Credit

This course is designed to introduce students to the social science of sociology—the study of human societies, social behavior and relationships. Areas of study will include the nature of culture, conformity and deviance, roles, relationships, group interaction, socialization, stratification, social institutions, major theoretical perspectives and sociological methods of research and data collection. Contemporary social issues and problems will also be examined.

Psychology 706

Grade Placement: 11-12 1 Credit

This course is designed to introduce students to the science of psychology. Students will explore the various sub-disciplines within psychology, along with the physical components of such and methods of applying the science to real-world situations.

Introduction to Developmental Disabilities 603

Grade Placement: 11-12 1 Credit

This course is designed to give students in grades 11 and 12, that are or may be interested in working the fields of occupational or physical therapy, special or general education, law, or within the medical field an overview of what it means to have a disability. Throughout the course we will explore various disabilities including physical and mental, intellectual disabilities, mental illness, autism spectrum disorder, among others. We will also look at how such things as how Title IX and ADA help to “level the playing” field for all. Throughout the year there will guest speakers, videos, articles and other opportunities to gain a better understanding and appreciation for those that have disabilities. We will review movies that deal with the subject of disabilities and discuss Hollywood’s view on disabilities. The course will also include text work, case studies, projects, and hands-on applications to expand our knowledge of what constitutes a disability.

Introduction to Developmental Disabilities Practicum 604

Grade Placement: 12 1 Credit

Recommended Prerequisite: Introduction to Developmental Disabilities

Students in 12th grade may choose to take part in the practicum by working with the students in the Life Skills classroom.

Child Development 670

Grade Placement: 9-12 .5 Credit

This course introduces the student to the importance of studying the growth process of children and developing parenting and career skills. Child development from conception through age five is a major focus. Classroom concepts are combined with practical applications and in-class activities. **This course must be scheduled concurrently with Adulting 101.**

Adulting 101 671

Grade Placement: 9-12 .5 Credit

Adulting 101 is a course designed to help students become prepared to face the challenges of becoming an adult and living on their own. Students will study career preparation, personal finance, budgeting techniques, housing decisions, personal life skills, developing social skills, parenting skills, nutrition and wellness guidelines, as well as basic culinary skills. **This course must be scheduled concurrently with Child Development.**

Creative Foods 673

Grade Placement: 9-12 1 Credit

This course is designed to introduce the student to the world of foods. Many areas of foods are studied such as fruits, vegetables, quick breads, yeast breads, cookies, pastries, meats, poultry and fish. Students select recipes to prepare from each of the food types. Foods and customs are studied from various regions of the United States as well as international cuisine. Additional topics studied in this course include nutrition, meal planning and dining etiquette.

Arts and Humanities Required Courses

Introduction to Art II 831

Grade Placement: Grade 9 .5 Credit

This course builds upon Introduction to Art I. Students will be introduced to higher level drawing, painting and more intermediate handbuilding techniques with clay. Art history is incorporated throughout lessons.

Music History and Literature 805

Grade Placement: Grade 9 .5 Credit

Students of Music History and Literature will explore the development of our Western culture, as well as other world cultures, through the medium of music.

Arts and Humanities Electives

Band 803

Grade Placement: 9-12 1 Credit

Suggested Prerequisite(s): Elementary Band, Jr. Band, school or private instrumental instruction

This course is structured to provide a performance venue for instrumentalists.

Chorus 804

Grade Placement: 9-12 1 Credit

This course is structured to provide a performance venue for vocalists.

Advanced Art I 832

Grade Placement: 10-12 1 Credit

Suggested Prerequisite: 85 or better in Introduction to Art II or Teacher Recommendation.

Builds and strengthens art techniques and skills. Projects will vary throughout the year with both 3D and 2D art forms, including introduction to ceramics, painting, and drawing.

Advanced Art II 833

Grade Placement: 11-12 1 Credit

Suggested Prerequisites: 85 or better in Advanced Art I or Teacher Recommendation.

First half of the year will focus solely on 3D artwork including focus on the pottery wheel, intermediate handbuilding techniques with clay and sculpture with the use of various materials. The second part of the year will focus on 2D art including intermediate drawing, painting, printmaking and various aspects of design. Students will build a portfolio throughout the year. Advanced Art II may be taken concurrently with Advanced Art III.

Advanced Art III 834

Grade Placement: 11-12 1 Credit

Suggested Prerequisites: 85 or better in Advanced Art I or Teacher Recommendation.

First half of the year will be with 2D work, including advanced drawing, painting, printmaking, collage and various advanced aspects of design. The second half of the year will be 3D work with the pottery wheel, sculptures and advanced ceramics. Students will build a portfolio throughout the year.

Advanced Art III may be taken concurrently with Advanced Art II.

Arts and Humanities (Foreign Language)

Spanish 1B 533

Grade Placement: 8-9 1 Credit

Prerequisite: A passing grade in Spanish 1A

Spanish 1B completes the 2-year sequence begun in Spanish 1A. Spanish 1A and 1B cover the same material as the traditional Spanish 1 class, but in a slower, more relaxed manner. Students may then continue on to Spanish II in grades 9 or 10.

Spanish I 522

Grade Placement: 9-12 1 Credit

Prerequisite: Students must have an 80% average or higher in the current English class.

Spanish I introduces the student to the Spanish language and culture. Students develop basic skills in pronunciation and intonation with emphasis on the communication skills of listening, speaking, reading and writing. The student will learn the basic rules of Spanish grammar in the present tense through stem changing verbs, along with basic communication expressions and sentence structure, and will discuss some of the customs, traditions and geography of the many Spanish-speaking countries.

Spanish II 523

Grade Placement: 10-12 1 Credit

Prerequisite: Passed Spanish I

Spanish II reviews and expands first year grammar structure and the development of the basic communication skills of listening, speaking, reading and writing. Vocabulary, sentence structure and phrases are increased to attain proficiency in the language. The student will learn two of the past tenses—both formation and usage. The understanding and appreciation of Spanish customs, culture and civilization are stressed throughout.

Spanish III 524

Grade Placement: 11-12 1 Credit

Prerequisite: Students must have passed Spanish II with an 80% average or higher.

Spanish III is available in grades 11-12 and seeks to further proficiency in listening, speaking, reading and writing. Increased emphasis is placed on conversation skills and readings, along with advanced grammar study and vocabulary. The student will learn to differentiate between past tenses (imperfect and preterit) in speech and writing. The subjunctive mood will also be introduced, along with command expressions. Further knowledge of Spanish and Latin American culture is covered throughout.

Physical Education and Wellness Required Courses

Health Education Grade 11 403

Grade Placement: Grade 11 .5 Credit

The senior high school wellness program is a comprehensive program that teaches the student about total wellness, physical, mental, and social wellbeing.

Physical Education Grade 9 409

Physical Education Grade 10 410

Physical Education Grade 11 411

.5 Credit

The physical education program facilitates development of skills and interest in fitness activities for all students.

Physical Education and Wellness Electives

Physical Education Grade 12 412

1 Credit

The physical education program facilitates development of skills and interest in fitness activities for all students.

Advanced Physical Education 422

Grade Placement: Grades 10, 11, 12 1 credit

Advanced Physical Education is an elective class designed for students that are looking for a highly competitive Physical Education atmosphere. This class will mirror the activities that are offered in other Physical Education classes. The class will be open to highly motivated students in grades 10, 11 and 12.

Advanced Physical Education II 488

Grade Placement: Grades 11, 12 1 credit

Prerequisite: Advanced Physical Education

Advanced Physical Education II is an elective class designed for students that are looking for a highly competitive Physical Education atmosphere. This class will mirror the activities that are offered in other Physical Education classes. The class will be open to highly motivated students in grades 11 and 12.

Business Information and Computer Technology Education Required Courses

Intro to Business 112

Grade Placement: 9 1 Credit

This course introduces the student to types of business organizations and their relationships with government and society. Modern business practices and the tasks involved in decision-making, budgeting, financing, marketing and directing personnel are reviewed. These topics will be taught with a focus on the Microsoft Office Word, PowerPoint, Excel and Publisher to provide real-world, hands-on applications of these programs to the world of business. The students will learn how to effectively use a database program to query information and create reports, a spreadsheet program to solve, analyze and compare data with charts and graphs, a presentation program to design electronic slide shows and a Web page program to create Web pages appropriate for personal or commercial use. Students will use online research techniques to acquire information, collect data and research careers.

This course is considered part of the scope and sequence of the approved Agriculture Program 1.9999 Agricultural/Animal/Plant/Veterinary Science and related fields, other.

Business Information and Computer Technology Education Electives

Accounting I 114

Grade Placement: 10-12 1 Credit

Prerequisite: Introduction to Business

Accounting for a Service Business Organized as a Proprietorship

The Accounting I course provides an introduction to the accounting processes and procedures of using worksheets to document all transactions involved in various types of businesses. Students will become familiar with the generally accepted accounting principles and procedures, double-entry accounting, the use of journals and ledgers, adjusting and closing entries, preparation of financial statements and completion of the accounting cycle for a service sole-proprietorship business. First year accounting provides the theory and skills necessary to keep financial records both manually and with the use of computers. This course provides basic accounting knowledge for students planning to enter college and pursue a career in a business-related field, students desiring entry-level employment, and students who plan to own and operate their own business.

Accounting II 115

Grade Placement: 11-12 1 Credit

Prerequisite: Accounting I

Accounting for a Merchandise Business Organized as a Partnership

The Accounting II course provides a deeper look into the accounting processes and procedures of using worksheets to document all transactions involved in various types of businesses. Students will journalize purchases, cash payments, sales, and cash payments, as well as prepare subsidiary ledgers, payroll records, and the preparation of financial statements and completion of the accounting cycle for a merchandise partnership business. Second year accounting provides the theory and skills necessary to keep financial records both manually and with the use of computers. This course provides basic accounting knowledge for students planning to enter college and pursue a career in a business-related field, students desiring entry-level employment, and students who plan to own and operate their own business.

Accounting III 116 (Independent Study)

Grade Placement: 12 1 Credit

Prerequisite: Accounting II

Accounting for a Merchandise Business Organized as a Corporation

The Accounting III course provides a deeper look into the accounting processes and procedures of using worksheets to document all transactions involved specifically in a merchandise business organized as a corporation. Students will record daily transactions using special journals, account for uncollectible accounts receivable, account for plant assets and depreciation, account for inventory, notes, and interest, account for accrued revenue and expenses, and prepare financial statements for dividends and end-of-fiscal-period documents for a merchandise corporation. Third year accounting provides the theory and skills necessary to keep financial records both manually and with the use of computers. This course provides basic accounting knowledge for students planning to enter college and pursue a career in a business-related field, students desiring entry-level employment, and students who plan to own and operate their own business.

Computer Aided Drafting and Design (C.A.D.D.) 611

Grade Placement: 10-12 1 Credit

Drafting (C.A.D.D.) is the study of industrial communication. Using the language of industry, students will learn how to draw three-dimensional objects in a two-dimensional format using lines and symbols in an industrial setting. Students will learn how to create and incorporate their projects into an interactive Website. The use of computers and drafting programs help the students to develop skills to communicate their information.

Architectural Drafting 612

Grade Placement: 11-12 1 Credit

This course will challenge students by more advanced and larger scoped architectural projects by means of plans, elevations and section drawings. Students will explore the fundamental design phases for small- and medium-sized residential and commercial projects. Students will complete projects using CAD software, where computer-aided drafting techniques and standards will be used to prepare two-dimensional architectural drawings.

Manufacturing I 601/ Manufacturing I (12) 675

Grade Placement: 9-12 1 Credit

This is an introductory woodworking course that provides students with the essential principles of woodworking. Safety and basic use of woodworking equipment are emphasized. Areas of study include wood technology, use of hand tools, portable power tools, basic machinery, basic joints and finishing techniques. Students will be required to complete chapter readings and written reports, as well as wood projects designed to develop fundamental woodworking skills.

This course is considered part of the scope and sequence of the approved Agriculture Program 1.9999 Agricultural/Animal/Plant/Veterinary Science and related fields, other.

Manufacturing II 661

Grade Placement: 10-12 1 Credit

Prerequisite: Manufacturing I

This course is a continuation of the skills learned in Manufacturing I. During this project-based course, students will construct more complex furniture or wood items. Major emphases will be given to the safety and effective use of hand tools, portable power tools and stationary power tools.

Manufacturing III 663

Grade Placement: 11-12 1 Credit

Prerequisite: Manufacturing II

This course is a continuation of the skills learned in Manufacturing I and II. Students will be exposed to basic engineering and robotic principles along with home improvement content and the construction of complex furniture items. Major emphasis will be given to the safety and effective use of hand tools, portable power tools and stationary power tools. The focus of the class will be project-based inquiry learning which develops a student's ability to adapt to modern day workforce skills.

Business Law and Ethics 105

Grade Placement: 10-12 1 Credit

Prerequisite: Introduction to Business

This course will alternate as a business elective with Sports and Entertainment Marketing.

The Business Law and Ethics course is designed to provide students with an overview of our legal system, including statutes and regulations that affect businesses, families, and individuals in a variety of ways. Students in this course will gain a basic knowledge of the legal system and how business law impacts commerce on the local, state, national, and international level. Students will also be able to distinguish unethical behavior from illegal behavior and to understand the rising importance of social responsibility as an aspect of corporations and organizations in a global society. Additionally, Business Law & Ethics will allow students the opportunity to examine the efforts of the courts and the legislature to deal with how technology has impacted the law, particularly with regard to computers and the Internet.

Agriculture/Natural Resources Education Program Required Courses

Northwest Area High School offers students an opportunity to focus their elective credits on Agriculture/Natural Resources. Seniors in the “Ag” Program can take the NOCTI Exam their senior year once they have completed a minimum of four Ag credits. If students qualify, they can then become Ag Completers and gain college credit at select post-secondary schools. The NOCTI Exam assesses work readiness in certain career fields.

***This course is considered part of the scope and sequence of the approved Agriculture Program 1.9999
Agricultural/Animal/Plant/Veterinary Science and related fields, other.***

Animal Science 631

Grade Placement: 9-12 1 credit

Students will explore the basic science concepts involved in the production of agricultural animals. All facets of modern agriculture are based on science. From the most rudimentary of cultural practices to the most complicated biotechnology techniques, scientific research has produced the phenomenon known as American Agriculture. The science of agriculture has brought humans from the stage of wandering and gathering food to modern civilization. Much of what we know about how living organisms reproduce and grow has come about through our quest to be more efficient in the production of food and fiber. Animal Science deals with the latest concepts in the animal industries, consumer concerns, animal products, and animals’ systematic processes including reproduction and digestion.

Pennsylvania Wildlife 623

Grade Placement: 9-12 1 credit

This class is designed for individuals who care about natural resources and the environment – beginning with the recognition that the Earth is home for both people and wildlife. Students will study wildlife species found in Pennsylvania. Topics include identification, biology, management, habitat improvement, hunting regulations and firearm safety. Students will work with agencies such as the PA Game Commission and local sportsman’s organizations.

World of Plants 629

Grade Placement: 9-12 1.0 credit

The purpose of this course is to give students a basic introduction to horticulture including greenhouse management, landscaping, floriculture, botany, and soil science. Hands-on activities include basic plant propagation, growing plants in containers, landscaping, planning a vegetable garden, floral design, reproduction and propagation, soil management and greenhouse operations.

Agricultural Mechanics 633

Grade Placement: 9-12 1 credit

This course will be a combination of the National Safe Tractor Driving Certification, Small Gasoline Engines and Basic Home Maintenance. The safe tractor driving section will allow students to legally drive a tractor before they can legally drive a car. Small Gas Engines will include safety, tool identification, engine parts and the complete disassembly and reassembly of a Briggs and Stratton engine. The basic home maintenance section will include basic electrical, plumbing and masonry instruction.

Agricultural Mechanics runs every other year and alternates with Living Forest and Welding.

Agribusiness 101 632 / AGM1

Grade Placement: 9-12 (Fall 0.5 credit)

Have you considered someday owning your own business? If so, this class is for you. We will discuss the topic of economics in agriculture, research prestigious agribusinesses in PA and build a business of our own from the ground up. We will answer the five important questions of the economic system and discuss the roles of individuals, businesses and society in the production process.

This course must be scheduled concurrently with Aquatics and Fisheries.

Aquatics and Fisheries 624 / AGM1

Grade Placement: 9-12 (Spring 0.5 credit)

In this course you will learn about taxonomy and habitat requirements. While learning internal and external anatomy and physiology of fish, students will create a replica of a certain species. You will research extensively a fish family and the species within it. Students will work with agencies such as the PA Fish and Boat Commission, Trout Unlimited and local watershed organizations.

This course must be scheduled concurrently with Agribusiness 101.

SAE: Work-based Learning 640

Grade Placement: 9-12 (1.0 credit entire school year)

Supervised Agricultural Experiences make learning relevant! To be successful in tomorrow's workplace and life, students need SAEs: planned, supervised, work-based applications of concepts and skills learned in agricultural education instruction. Instead of just talking about agriculture or the environment, students learn by conducting experiments, working in a greenhouse or agribusiness or raising animals. This credit is completed outside of regular school hours. Student must be concurrently enrolled in an agriculture class to be eligible.

Off-Campus Elective Offerings

Cooperative Education - Diversified Occupations (Work Co-op or Work Study) 0001

Cooperative Education is a structured method of instruction for qualified seniors combining school-based classroom learning with productive work-based learning at a training site in business and industry in an occupation matching the student learner's academic and career objective.

Cooperative Education is a partnership among students, parents/guardians, educational institutions, and employers, with specified responsibilities for each party. These include, but are not limited to:

- A written training agreement detailing responsibilities and a written training plan including work-based competencies relevant to the student's career choice
- Specified minimum work periods equivalent in length to an academic term (quarter, semester, etc.)
- Recognition of an employer/employee relationship which enforces all state and federal laws- Particular attention given to the Child Labor Laws regarding work permits, working hours, insurance, worker's compensation, safety and hazardous occupations, and mandated clearances
- Work experiences monitored by the instructor and supervised by employers
- Formal recognition of the experience by the school (e.g. grade, credit hours, etc.)
- Evaluations and assessments completed by the instructor and the employer
- Remuneration for the work performed

West Side Career and Technology Center

The West Side Career and Technology Center is a full-time comprehensive technology school serving students in grades 9 through 12 from member districts. A complete academic curriculum compliments the 15 career-technical programs that lead to immediate career or college admission. Our integrated competency-based curriculum provides a quality educational community in which students will learn academic, career, technical, and soft skills necessary to prepare them to be contributing members of our society, skilled members of the workforce, and responsible life-long learners prepare to meet the challenges of the 21st century.

As part of the admission process, we invite students and their families to tour the facility while school is in session. In addition, we highly encourage students to schedule a Shadow Day to meet our students and participate in daily CTE program activities. This allows students to experience one or more programs to determine first-hand if a program is a good fit for their future goals. This allows

Visit our website at www.wsctc.net or your guidance office to obtain an application to enroll. In order to be considered, students must complete sufficient credits to be promoted to ninth grade. Students are not guaranteed their first career choice. The acceptance and placement process will be determined by, but not limited to, program availability, credit requirements, attendance, academic involvement, grades, and behavioral infractions and standardized test results.

In addition to offering hands-on technology that prepare students for immediate employment, WSCTC provides other opportunities for students to grow and develop. Our academic courses prepare students for college admission, and our Early College program allows students to earn college credit during school hours or as part of after school offerings. Each CTE program also offers industry recognized credentials for students who qualify and co-curricular activities that are career related. Students may also participate in sports at the sending district.

Part-Time Program

Students may be eligible for part-time enrollment at West Side CTC. Students attend their home school for their academic classes and report to West Side CTC for career and technical training. Admission to this program is limited and a consultation with both schools is necessary to review academic standards and credits.

Students Occupationally and Academically Ready (SOAR)

The PA Department of Education supports career and technical education students aligning their CTE courses to a college program in order to complete a degree, diploma or certificate. Information about earning advanced credits and statewide articulations can be viewed at www.collegetransfer.net.

Diversified Occupations

Cooperative Education is a structured method of instruction for qualified seniors combining school-based classroom learning with productive work-based learning at a training site in business and industry in an occupation matching the student learner's academic and career objective. Cooperative Education is a partnership among students, parents/guardians, educational institutions, and employers with specified responsibilities for each part.

Northwest Area Dual Enrollment Program

The following are the criteria for the Northwest Area Dual Enrollment Program for seniors:

- SAT score of 500 Critical Reading and 500 Math (or placement test as required by institution)
- Recommended cumulative grade point average of 85 or above
- No more than 15 absences during the previous school year
- Recommendation from Guidance Counselor

The following are the criteria for the Northwest Area Dual Enrollment Program for juniors:

- SAT score of 500 Critical Reading and 500 Math (or placement test as required by institution)
- Recommended cumulative grade point average of 95 or above
- No more than 15 absences during the previous school year
- Recommendation from Guidance Counselor

Please note, these are general guidelines and requirements. Some colleges and universities may have additional criteria that need to be met.
